AEROSOL SCIENCE AND TECHNOLOGY

THE JOURNAL OF THE AMERICAN ASSOCIATION FOR AEROSOL RESEARCH

VOLUME 3, 1984

CONTENTS

Editorial 1

Particle Deposition by Diffusion and Interception from Boundary Layer Flows 3
R. Parnas and S.K. Friedlander

Dynamics of Fibrous-Type Particles: Brownian Coagulation and the Charge Effect 9
Paul S. Lee and David T. Shaw

Flat Flame Ultrafine Aerosol Generator 17
R. Vijayakumar and K. T. Whitby

Bipolar Steady State Charge Fraction of Ultrafine Aerosols 25
R. Vijayakumar and K. T. Whitby

Advances in the Measurement of Ambient Carbon Fibers 31
Billy W. Loo, Tom C. Adler, Fred S. Goulding, Don A. Landis, and Norm W. Madden

Light Scattering by Nonspherical Particles: A Laboratory Study 39
A. Coletti

Log-Normally Preserving Size Distribution for Brownian Coagulation in the Free-Molecule Regime 53
K. W. Lee, H. Chen, and J. A. Gieseke

Venturi Scrubber Optimization Revisited 63
Douglas W. Cooper and David Leith

Homogeneous Condensation of Argon: An Experimental Study Using the Nozzle Flow of a Cryogenic Ludwieg Tube 71
J. Steinwandel and T. Buchholz

Effect of Coal Type and Residence Time on the Submicron Aerosol Distribution from Pulverized Coal Combustion 77
William P. Linak and Thomas W. Peterson

Single-Breath Deposition of Jet-Nebulized Saline Aerosol 97
Beth L. Laube, David L. Swift, and G. Kenneth Adams III

Technical Note: Estimation of the Heterogeneous Lifetime of Gaseous Species in the Presence of Aerosol Surface 103
George M. Sverdrup

Measurements of Kelvin-Equivalent Size Distributions of Well-Defined Aerosols with Particle Diameters above 13 nm 107
B. Y. H. Liu, D. Y. H. Pui, R. L. McKenzie, J. K. Agarwal, F. G. Pohl, O. Preining, G. Reischl, W. Szymanski, and P. E. Wagner

Computer Program and Algorithm Review: MAEROS 117
Fred Gelbard

Upcoming Conference 119

Kenneth T. Whitby 121
P. H. McMurry

Intrinsic Calibration of the Pollak Counter—A Revision 125
David Sinclair

Nucleation and Growth of Aerosol from a Continuously Reinforced Vapor 135
Dale R. Warren and John H. Seinfeld

Growth and Deposition of Saline Droplets Covered with a Monolayer of Surfactant 155
Y. Otani and C. S. Wang

Aerosol Particle Formation from Ozone-Terminal Olefin Reactions 167
Edward Franzblau, C. S. Burton, and G. M. Hidy

Closed Form Equations for the Evaporation Rate and Droplet Size of Knudsen Droplets 177
Albert E. Seaver

Air Flows Induced by Sparse Clouds of Droplets 187
David S. Bright, Robert A. Fletcher, and Howard R. Baum

Aerosol Capture in Granular Beds in the Sedimentation and Diffusion Dominated Regimes 195
Larry A. Mann and Simon L. Goren

Aerosol Deposition in the Human Lung at Variable Tidal Volumes: Calculation of Fractional Deposition 215
S. J. Rothenberg and D. L. Swift

Multiple Electromagnetic Scattering from a Cluster of Spheres. I. Theory 227
F. Borghese, P. Denti, R. Saija, G. Toscano, and O. I. Sindoni

Multiple Electromagnetic Scattering from a Cluster of Spheres. II. Symmetrization 237
O. I. Sindoni, F. Borghese, P. Denti, R. Saija, and G. Toscano

Particle Deposition in Replicate Casts of the Human Upper Tracheobronchial Tree Under Constant and Cyclic Inspiratory Flow. I. Experimental 245
Joshua L. Gurman, Morton Lippmann, and Richard B. Schlesinger

Particle Deposition in Replicate Casts of the Human Upper Tracheobronchial Tree Under Constant and Cyclic Inspiratory Flow. II. Empirical Model 253
Joshua L. Gurman, Paul J. Lioy, Morton Lippmann, and Richard B. Schlesinger

Lidar and Balloon-Borne Cascade Impactor Measurements of Aerosols: A Case Study 259
J. A. Reagan, M. V. Apte, T. V. Bruhns, and O. Youngbluth

Measurements of Radon and Radon Daughter Aerosols in Socorro, New Mexico 277
A. C. George, E. O. Knutson, D. Sinclair, M. H. Wilkening, and L. Andrews

On Ostwald Ripening 283
T. H. Tsang and J. R. Brock

Measurement of Aerosol Concentration as a Function of Size and Charge 293
Arthur Biermann and Werner Bergman

Theoretical Response Characteristics of the Coherent Optical Particle Spectrometer 305
Donald R. Pettit and Thomas W. Peterson

A Perturbation Model for the Computation of Collection Efficiency for Axially Symmetric Collectors 317
Dallas O. Banks and Gary J. Kurowski

Coagulation Rate of Polydisperse Particles 327
K. W. Lee and H. Chen

Water Solubility of Cloud-Active Aerosols 335
V. K. Saxena and G. F. Fisher

Letter to the Editor: On "Inversion" of Aerosol Size Distribution Data 345
Igor Gonda

Upcoming Conferences 347

Aerosol Science and Technology in Service to Society 351
S. K. Friedlander

Condensational Growth of Ultrafine Aerosol Particles in a New Particle Size Magnifier 353
K. Okuyama, Y. Kousaka, and T. Motouchi

A Condensation Feedback Mechanism for Oscillatory Nucleation and Growth 367
Robert McGraw and James H. Saunders

The Effect of Particle Precharging on the Performance of a Fabric Filter Collecting Lead Smelter Dust 381
W. Humphries, J. J. Madden, and M. Miceli

Dynamics and Measurement of Smokes III—Drag and Orientation of Chain Aggregates in an Electrical Mobility Spectrometer 397
H. Y. Wen and G. Kasper

Dynamics and Measurement of Smokes IV—Comparative Measurements with an Aerosol Centrifuge and an Aerodynamic Particle Sizer APS33 Using Submicron Chain Aggregates 405
G. Kasper and H. Y. Wen

Evaluation of Metal Oxide Whiskers Grown on Screens for Use as Aerosol Filtration Media 411
James M. Brewer and Simon L. Goren

Reducing Blowoff in Cascade Impactor Measurements 431
Gregory R. Markowski

A Sample Extraction Dilutor for Ultrafine Aerosol Sampling 441
J. E. Brockmann, B. Y. H. Liu, and P. H. McMurry

Total Deposition of Ultrafine Hydrophobic and Hygroscopic Aerosols in the Human Respiratory System 453
K. W. Tu and E. O. Knutson

Large Particle Size Distribution in Five U.S. Cities and the Effect on a New Ambient Particulate Matter Standard (PM_{10}) 467
Dale A. Lundgren, Brian J. Hausknecht, and Robert M. Burton

Upcoming Conferences 475

Author and Title Indexes 479
